Blogging Terms and Vocabulary

Across

3. Similar to posts, but are best for "static" content which you want to always be accessible and doesn't change to often.
4. These are the blocks that make up sidebars. Popular ones include the ability to subscribe to a blog, user statistics, and suggested links.
6. The location and even existence of these depend on your theme. Some themes even have 3 or more. You can add and rearrange widgets in these from your blog's dashboard.
8. Usually one of the first things bloggers do is change this, which is the look of the blog.

Down

1. Extended features that you can turn on and off on your blog. Popular ones include form creation, facebook and twitter connections, and calendars.
2. Depending on your theme, these are allowed on posts and sometimes on pages. Here, users can reply to what you write, leave links, and create a general discussion.
3. The basic entries of blogs. Usually, the main page of a blog shows all of these in reverse chronological order.
5. This is the back-end area of your blog where you make changes and edits. This area is not seen by the public and only accessible to blog administrators, editors, or contributors.
7. Stands for "Really Simple Syndication" which is a way for people to subscribe to and follow your blog.
